## Electrostatic Application System

**Fastest way  
to disinfect!**

### 7 SOLUTIONS IN ONE!

#### EPA REGISTERED HOSPITAL DISINFECTANT CLEANER

Proven to kill a wide range of viruses and bacteria, won't contribute to the C formation of mutating "super bugs," and does not contain volatile organic compounds (VOCs).

#### NSF REGISTERED (D-2) NO RINSE REQUIRED FOOD CONTACT SURFACES SANITIZER

Kills 99.999% of food borne bacteria, including E. coli, Salmonella, and Listeria in less than 60 seconds.

#### MOLD & MILDEW KILLER

Kills and prevents spores with up to 7 months residual effects. Safe on a wide range of surfaces from marble to carpeting and beyond.

#### ALLERGEN ELIMINATOR

Proven effective on pet dander as well as dust mite and cockroach allergens. Can be used directly on pet bedding and sleeping areas.

#### ODOR ELIMINATOR

Ends malodors caused by smoke, trash, septic systems, stale cooking, and more. Contains no masking agents or fragrances and is highly effective at neutralizing urine and fecal odors.

#### SOFT SURFACE SANITIZER

Used on a wide range of soft surfaces. Kills odors and odor-causing bacteria on soft surfaces by eliminating the source. Great for upholstery, curtains, and auto interiors.

## WHY OUR PRODUCT IS SUPERIOR?

Not all disinfectants and mold removers are created equal. We use a unique chemical compound called chlorine dioxide. Chlorine dioxide has been used during Anthrax attacks, in at the aftermath of Hurricane Katrina, to purify drinking water, and most recently to kill MRSA in schools and hospitals. While other competitors and manufactures have attempted to copy and produce a form of stabilized chlorine dioxide similar to our product, however our products revolutionary formula is simply unequaled. Also consider carefully what kind of chemicals you want around your children, employees, guests, students, friends, and family members. When evaluating and comparing disinfectant products, take a close look at their core ingredients. Most disinfectants and mold removers on the market are extremely toxic and leave behind harmful byproducts and nauseous fumes.

The product we use however, you no longer need to use bleach and other harsh chemicals that increase the volatile organic compounds (VOC's) in your environment. You can have the peace of mind that you are using a disinfectant that won't irritate your skin and doesn't come with any alarming safety warnings and precautions, while still effectively eliminating pathogens and allergens in your home and workspace.

## WHY IS ELECTROSTATIC SPRAYING SUPERIOR?

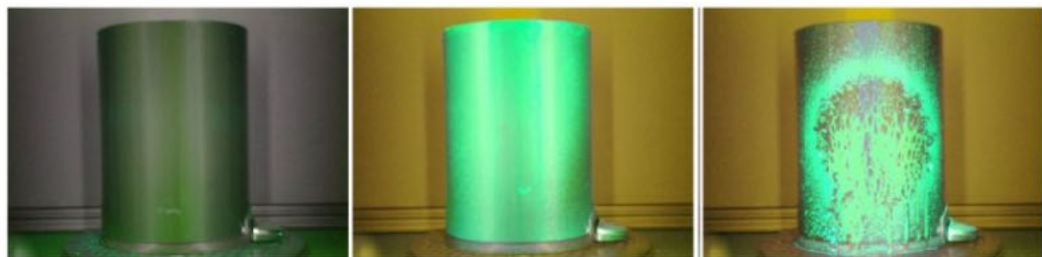

Our patented system places a powerful electrostatic charge on the disinfectant as it leaves the spray nozzle creating a greater adhesion and attraction to the target area. The product will stick to the front, back, sides, and underneath the area without spraying it directly, giving you complete coverage. This system allows for efficient spraying saving you time and money, and is the industries leading application system.

# HOW IS OUR SERVICE BENEFICIAL TO YOUR BUSINESS?

- **STOP USING HARSH CHEMICALS ON YOUR EXPENSIVE INTERIORS!**
    - Our product is safe for all your soft and hard surfaces and will not damage surfaces like other harsh chemicals such as bleach, extending the life of your asset.
  - **GIVE YOUR GUESTS THE PEACE OF MIND AND COMFORT KNOWING THEY ARE SAFE IN A COMPLETELY COVID-19 FREE SANITIZED SPACE!**
    - Your guests will rest assured knowing that we concentrate 100% on sanitation and have an electrostatic delivery system that will cover even the most hard to reach and over looked surfaces.
  - **PROTECT YOURSELF FROM LIABILITY CLAIMS!**
    - Liability lawsuits whether it be a guest or your own staff are some of the hardest to defend, taking up a lot of time and valuable resources. Our company will act as an additional layer of protection by using the BEST technology and chemical in the industry that is EPA approved for hospitals yet safe enough for daycares.
  - **QUICK AND EASY APPLICATION SYSTEM SAVES YOU TIME AND MONEY!**
    - Studies have shown that our delivery system is 17 times faster than spraying and wiping. Another way to think about it is it takes 17 man hrs to do the job that one of our delivery systems can do in an hour with electrostatic technology. Don't sacrifice the quality of your sanitation services for a quick turnaround.
  - **PROTECT YOUR GUESTS, YOUR STAFF, AND YOUR INDUSTRY!**
    - Its inevitable cleaners will get tired after a long hard day. Too often cleaners only have a short amount of time to complete all their cleaning (and now sanitation) tasks before the next check in. Undoubtedly they will forgo sanitizing every surface and may only wipe the high touch surfaces like counter tops and door knobs, yet forgo the underside of the table where little Johnny COVID wiped his dirty hands. Having everything ready for your guests is paramount to guest experience, that includes SANITIZING EVERYTHING! Protect your guests, your staff, and your industry with REV Sanitation Services.
